PADI
Enriched Air Nitrox
Instructor: ED DUNN

Instructor #: 88086

Why Enriched Air Nitrox? Well if you enjoy longer bottom times then what is allowed with a normal air fill, you want nitrox. Nitrox allows you to enjoy not only longer NDL times, but the depth you dive to is equivalent to a shallower dive. They are just two of the benefits of diving nitrox.

Additional information for the class:

Thur. Academics at 1730, Shogun Inn Bldg 331, 4th floor conference room.

Enriched Air Nitrox Student Package.

Enriched Air Nitrox Recreational Dive Planner, both 32% and 36%.

Enriched Air Nitrox O2 Partial Pressure and Equivalent Depth Tables.

A calculator. Pencil and pen.

If you have any other questions let me know.

Thank you for choosing Kadena Marina for your continued diver education.

See ya down under.
